

Integrated community

SINCE the launch of Azure Blue at Redcliffe in late 2009, a quarter of available apartments have already been reserved by buyers. "Predominantly we have accepted these commitments from locally based people that have been waiting for the right opportunity that best suits their needs," according to retirement living residential advisor Adrian English.

"Instant appeal, genuine value for

money, great apartment designs and security are the top reasons people have committed to Azure Blue. It offers one of the most enticing retirement residential options Redcliffe has ever seen."

Azure Blue is an integrated community with a focus on convenience, recreation and lifestyle through its planning, architectural vision and facilities.

Mr English said a lot of residents

wanted to maintain their Redcliffe base, but were determined to enjoy maintenance-free lifestyles.

The community will offer a selection of large one, two and three-bedroom apartments and a range of fully serviced apartments.

All residents have access to the range of services, which include meals, laundry, cleaning as well as the option for in-home care provided by Blue Nurses. The site also offers the added

security of a co-located Blue Care residential aged care facility.

Facilities include a swimming pool, barbecues, gymnasium, hairdresser, community centre, hobby centre, DVD and book library, cinema and a cafe and restaurant.

An information centre on site is open daily 10am to 4pm at 91 Anzac Avenue Redcliffe.
